

Dear students,

So you have another week of „homeschooling“and I’ve found an interesting exercise for you:

① You are listening to a speech hold by Bill Gates in 2015. (Worksheet) He was warning mankind of the dangers of a virus that would kill ten thousands. You need not understand everything, don’t worry. Just listen for gist – that means *you just try* to understand what somebody is saying even if you can’t understand every phrase or sentence. So please do the exercises on this worksheet. You may send your writing tasks to me. Remember how important it is to practice writing regularly.

② Please do all the exercises you haven’t done so far. **Do this for your own sake.**

③ Revise vocab unit 1-3.

Have a good day! Ste
